

Our line of electric, skid-mounted Dust Collectors is designed to pack a maximum performance punch into a minimum of floor space for all your shipyard air cleaning needs. Available sizes range from 6,000 cfm to 20,000 cfm and include the following features standard:

- Fully interchangeable top loaded filters in a vertical arrangement for natural release of dust.
- Specially designed 100% polyester filters standard, with optional upgrade to HEPA-rated available.
- Safety low duct hose connection with easy access to three sides of skid, even if dust collector itself is elevated
- ADI-pioneered direct drive fan eliminates the need for complicated belt-drive
- Heavy construction with top doors for easy filter access
- Optional boxed skid design with lifting eyes and integrated fork lift pockets
- Telescoping support legs provide clearance for standard 55 gallon drum at dust discharge valve
- Stainless steel control panel standard
- Optional on-board air compressor for self contained operation
- Soft start for fan motor optional.
- Sound enclosure upgrade optional

Dust Collectors are commonly used in industrial settings to control air pollution. These machines keep the worker safe and the environment clean everywhere from shipyards to fracking sites.

Our line of electric-powered, skid-mounted Dust Collectors are available in a range of models designed to pack a maximum performance punch into a minimum of floor space for all your shipyard air cleaning needs. These heavy-duty machines utilize a unique, compact design which prioritizes ease of use (convenient all-sides duct connection access even if the machine is elevated, low maintenance direct fan drive, and integrated fork lift pockets) without sacrificing superior dust removal performance.

Atlantic Design, Inc. is a family owned and operated business in Baltimore, Maryland. We have over 38 years experience in the Blasting and Coating Industry, and we pride ourselves in providing innovative and efficient solutions for our customer's needs.
