

Clemco equipment is trusted across a wide range of industries . . .

• Heavy Equipment

Clemco provides high-performance blast rooms and integrated blasting solutions that quickly remove paint, rust, and corrosion from heavy equipment—helping manufacturers restore productivity, improve reliability, and extend component life.

• Infrastructure

Clemco designs blasting systems for tough infrastructure restoration, with durable, reliable equipment that helps crews work faster, cleaner, and more safely.

• Oil & Gas

Clemco offers solutions that protect vital oil and gas assets by removing corrosion and contaminants, ensuring superior coating adhesion and lasting durability. Clemco systems help operators extend equipment life, reduce maintenance, and keep operations running safely and efficiently.

• Power Generation

Clemco engineers reliable, high-performance blasting solutions for the power generation industry, delivering spec-grade finishes that protect infrastructure and ensure long-term strength.

• Ship Building

Clemco blasting solutions help shipbuilders achieve superior corrosion control and surface restoration, delivering clean, consistent finishes that extend vessel life and ensure mission readiness.

Line of Abrasive Blast Machines

.5 & 1 cuft Classic Abrasive Blast Machine

Portable Blast Machines deliver fast, efficient surface preparation for light-duty applications in confined or hard-to-reach areas. Designed for mobility and ease of use, these compact units provide the same reliability and performance Clemco is known for—making them an ideal choice for contractors who need dependable, versatile blasting power wherever the job takes them.

Features:

- Perfect for quick, light-duty jobs with tight or remote access
- Minimal Air Requirements
- Designed for Multi-Tasking Contractors

3 & 6 cuft Classic Abrasive Blast Machine

Classic Blast Machines in 3- and 6-cuft models deliver durable, high-performance surface preparation for any job. Built for tough conditions, their rugged, easy-to-maintain design ensures consistent results—from small touch-ups to large projects like bridges, pipelines, and tanks.

Features:

- Portable Power for Mid-Sized Jobs
- Versatile for small to large scale blasting
- Great fit for rental fleets

6 cuft Lo-Pot Classic Abrasive Blast Machine

The 6-cuft Lo-Pot delivers powerful, reliable blasting performance with a compact, low-profile design. Its innovative construction makes loading faster, easier, and safer, reducing downtime and boosting efficiency. Built for durability and consistent results, it stands up to the demands of any job site. Ideal for contractors who prioritize productivity, the Lo-Pot ensures every project is completed efficiently and effectively.

Features:

- Easier Loading
- Versatile for small to large scale blasting
- Portable Power for Mid-Sized Jobs

8 cuft Classic Abrasive Blast Machine

Clemco Stationary Blast Machines deliver extended blasting time and maximum productivity for even the most demanding jobs. Designed for continuous operation, they provide consistent, reliable productivity for even the most demanding jobs. Their flexible setup allows easy integration into a variety of work environments and project types. Ideal for maintenance, rehabilitation, and industrial tasks, these machines help crews work efficiently and effectively on every project.

Features:

- Dual chamber delivers uninterrupted blasting time
- Ideal for high demand environments
- Efficient for maintenance

10 & 20 cuft Classic Abrasive Blast Machine

Clemco 10- and 20-cuft Stationary Blast Machines deliver long-lasting blasting performance and high productivity for demanding jobs. Their robust design ensures consistent, reliable results, even under heavy use. With the flexibility to be mounted on flatbeds or trailers, they can be easily transported to any job site. These machines provide contractors with powerful, efficient blasting wherever and whenever it's needed.

Features:

- Mobile Jobsite Flexibility
- Remote Staging Advantage
- Ideal for high-demand environments

4 & 6 cuft Contractor Abrasive Blast Machine

Clemco Contractor Blast Machines deliver durable, portable power for mid-to-large scale projects. Built to withstand tough conditions, the contractor frame and additional set of wheels makes for easy transport and can operate anywhere. The 6-cuft model adds enhanced durability and reliability for demanding or rental use, providing consistent, powerful blasting and high-quality results for every project. These machines stand up to the toughest job site conditions day after day.

Features:

- Perfect for rental and high usage scenarios
- Versatile for small to large scale blasting
- Designed for Contractors

Bulk Abrasive Blast Machines

Bulk Blast Machines deliver high-efficiency, multi-operator performance for demanding industrial blasting projects. With industry-leading refill speed and 175-psi blasting power, they maximize productivity on every job. Advanced media handling ensures smooth operation while maintaining safety and control throughout the process. These machines keep large-scale blasting operations running reliably, efficiently, and without interruption.

Features:

- Multi-Operator Capability
- High Pressure Performance
- Fast Refill System
